PROFESSIONAL SUMMARY:

Senior Full-Stack Developer with 8+ years of end-to-end ownership across enterprise SaaS, fintech, healthcare, and logistics platforms. Known for architecting systems from the ground up, including a cargo ERP processing 1,000+ daily orders, a multi-tenant live education platform, and a corporate banking portal for Axis Bank's MSME division. Deep expertise in React, Node.js, GraphQL, Next.js, React Native, Meteor.js, and cloud-native architectures. Comfortable owning the full lifecycle from whiteboard to production and trusted to make the right technical calls independently.

PROFESSIONAL EXPERIENCE:

Scaleteam Technologies Pvt. Ltd.

Surat, India

Senior Full-Stack Developer | Senior Consultant

June 2017 – December 2025

- Served as the primary senior engineer across 6+ enterprise client engagements spanning fintech, healthcare, logistics, and SaaS — owning full lifecycle delivery from architecture design to production deployment.
- Architected and solely built a cargo logistics ERP (web + mobile) processing 1,000+ daily orders, migrating a legacy PHP system to a modern React, NestJS, and GraphQL stack with zero data loss during SQL-to-MongoDB migration.
- Led frontend development for Axis Bank's MSME corporate banking portal using React microfrontend architecture, mentoring 4 developers and driving a 90% reduction in production bugs through rigorous code reviews and component standardization.
- Designed a multi-tenant SaaS architecture for a live education platform, integrating Jitsi-based video conferencing, Stripe subscription billing, and UTC-based scheduling—supporting large-scale virtual events across custom subdomains.
- Built a patient management system supporting 450+ disease workflows using a single dynamic Form.io-based schema, eliminating hundreds of disease-specific database schemas and significantly reducing maintenance overhead.
- Improved performance of a real-time logistics platform handling millions of records by optimizing MongoDB queries, Meteor Pub/Sub subscriptions, and reactive data pipelines—with interactive analytics dashboards for operational decision-making.
- Established and maintained CI/CD pipelines, Docker-based deployments, and AWS infrastructure (EC2, S3) across multiple production systems, ensuring reliable and scalable release processes.
- Mentored junior developers, led technical decision-making, and enforced engineering best practices through pair programming, documentation, and structured code review processes.
- Best Performer Employee Award – 2021

EDUCATION:

May 2014 – April 2017 **Bachelor of Computer Applications (BCA)**

Veer Narmad South Gujarat University | Surat, India

Major Subjects: Advanced Web Designing | Mobile Application Development | Data Structure and Algorithms.

LANGUAGES:

English – Professional Proficiency

German – A2 (actively improving toward B1)

Hindi – Native

Gujarati – Native

TECHNICAL SKILLS:

Languages & Core Architecture

JavaScript (ES6+), TypeScript, C++, OOPs, SOLID Principles, system design, and Design Patterns

Frontend & Mobile

React Native, ReactJS, Next.js (App Router), HTML5, CSS3, Bootstrap 5, Material UI, Shadcn/UI, i18n

APIs, Real-Time & Security

GraphQL (Apollo), REST & Web APIs, WebSockets, Socket.io, JWT, OAuth, RBAC, Axios, Fetch, Request

Third-Party Integrations

Stripe, PayPal, PayStack, Jitsi, Form.io, Jira (as a service), Elasticsearch, Azure AD,

Backend & Full-Stack

Node.js, Express.js, Fastify, NestJS, Microservices, MeteorJS (React, Blaze template)

Databases, Cloud & DevOps

MongoDB, SQL Database Design, MySQL, Firebase, AWS (EC2, S3), Docker, Kubernetes, CI/CD pipelines

Testing & Quality Assurance

React Testing Library (RTL), Jest, Cypress, Mocha, Chai, Unit Testing, code review, and Pair Programming

Tools & Methodologies

Git, Xcode, TestFlight, Jira, Agile, Scrum, Mobile Release Lifecycle

MAJOR PROJECTS:

Axis Bank MSME Corporate Banking Portal (Xebia – Remote) As Senior Consultant

Tech Stack: ReactJS, TypeScript, Redux Saga

Led the development of the corporate banking portal used by Axis Bank's MSME division, using the React microfrontend architecture platform. Redesigned dashboard using reusable, responsive components, improving maintainability and reducing code duplication across modules. Mentored a team of 4 developers through code reviews and pair programming, contributing to a 90% reduction in production bugs and improved user experience.

Growkarma – Live Streaming & Education Platform

Tech Stack: ReactJS, GraphQL, Node.js, Jitsi, Docker, MongoDB

Implemented Jitsi, Zoom, and YouTube Live integrations to support large-scale virtual events and webinar delivery. Designed a multi-tenant SaaS architecture with custom subdomains and Stripe-based subscription/payment management. Resolved global timezone and DST scheduling issues using UTC-based architecture, automated data correction scripts, and custom .ics calendar generation.

Ship My Shopping – ERP System for Transport & Logistics

Tech Stack: ReactJS, TypeScript, Node.js, NestJS, MongoDB, Docker, AWS s3, GraphQL, React Native, CI & CD

Solely redesigned and modernized a cargo logistics platform (web, customer app, delivery app, and admin panel) supporting 1,000+ daily orders. Migrated legacy PHP architecture to React and Node.js, enabling real-time operations and improving scalability, performance, and maintainability. Redesigned and normalized a complex database architecture, consolidating 35+ schemas and leading SQL-to-MongoDB migration with zero data loss through automated XML-to-JSON data pipelines.

NexusZ – Logistics Management System

Technologies: MeteorJS (ReactJS), Node.js, MongoDB

Improved performance of a logistics platform handling millions of records by optimizing Meteor Pub/Sub subscriptions, database queries, and reactive data updates. Developed real-time monitoring and analytics dashboards for import/export operations, vessel tracking, shipment planning, and company-level reporting. Implemented advanced data visualizations, including interactive maps and Sankey charts, enhancing operational visibility and logistics decision-making.

Followup 2.0 Healthcare Data Platform

Tech Stack: ReactJS, TypeScript, Node.js, MongoDB, GraphQL, Form.io, Jira as service

Architected a scalable patient management system supporting 450+ disease workflows by leveraging Form.io and a dynamic data model, eliminating the need for hundreds of disease-specific database schemas. Reduced system maintenance overhead and improved extensibility by implementing a single configurable schema capable of handling diverse clinical data requirements. Built a Jira-integrated patient follow-up workflow, enabling efficient case management, status tracking, and cross-functional collaboration between healthcare providers and administrative teams.

ADDITIONAL INFORMATION:

- Currently based in Germany and open to opportunities across Germany.
- Interested in artificial intelligence, modern scalable systems, frontend architecture, intelligent automation, and modern JavaScript ecosystems.
- References and employment certificates available upon request.
